Subject: SETAC - Pesticide Risk Assessment for Pollinators
Attachments: SETAC Book - format preference list.xlsx

All,

If you have not already heard, I am happy to inform you that the SETAC book, Pesticide Risk Assessment for Pollinators, proceedings from a Pellston Workshop, is nearly ready for shipping.

The book is being distributed by Wiley, the publisher, see:

<http://www.wiley.com/WileyCDA/WileyTitle/productCd-1118852524,subjectCd-LSC0.html> .

and I understand that it also being distributed by vendors such as Barnes and Noble, Amazon and likely others as well.

As a contributor, you receive a complementary copy.

I have attached a spread sheet for you to indicate whether you want that copy to be in hardback or in e-book form (put a mark in the column indicating which format you prefer).

If you want a hardback copy, please also provide a mailing address.

I will compile the info. and forward to SETAC who will ship you your copy.

On behalf of Dave and I, congratulations to everyone.

Despite the time that has passed between the Workshop and now, the Pellston Workshop, without doubt, was a very important effort and a significant contribution, at a global level, to the protection of pollinators.

Kindest regards,
Tom Moriarty
